

Hunter-Pro Lite & Captain Lite

The Hunter-Pro Lite and Captain Lite are PIMA's new wired and hybrid systems aimed to meet the growing need for cost-effective professional and reliable alarm systems.

Ease-of-Use

The Hunter-Pro Lite and Captain Lite feature PIMA's renowned intuitive, menu-driven programming and ease-of-use. Communication to the Alarm Centre and end-user is done via GSM (SMS, GPRS), long-range radio and a network card.

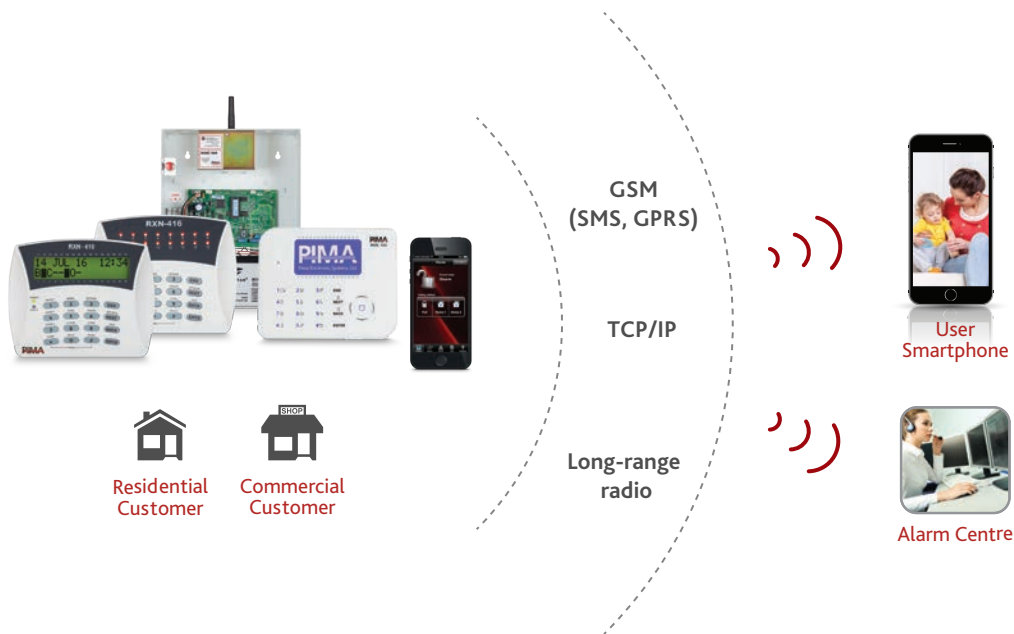

Expandable Wired & Hybrid Systems

Both wired products can be transferred into hybrid products by simply adding a receiver. Thus, the 8 onboard wired zones are easily expandable to grow alongside your security needs: the Captain-Lite is expandable to up to 16 zones (including 8 wireless zones); the Hunter-Pro Lite up to 32 zones (including 24 wireless zones).

The Perfect Domestic & Commercial Solutions

Hunter-Pro Lite and Captain Lite are the ultimate choice for small residential and commercial installations where PSTN communication is not essential.

Main Features

- Complete panel integration with GPRS, TCP/IP, SMS, and long-range radio
- On-line connection to central station via a secured and supervised TCP/IP channel
- Zone-doubling for cost-effective installations
- Prevention of duplicate user codes
- Quick programmer with preset configuration and zone characteristic copying for fast and simple installation
- Continuous battery testing
- Panel no-arming report to the Alarm Centre (for senior citizens)
- Keypads and programming menus available in major languages
- Easy system remote control via smartphone apps

Both Hunter-Pro Lite and Captain Lite are Fully Compatible With:

Multiple Communication Modules

- Network TCP/IP module (net4pro)
