# VWM500

Wi-Fi module for Vision

VWM500 is a Wi-Fi module that provides the Vision alarm system the ability to communicate with the network by wireless channel.

Features

- Connect to standard WiFi networks
- Supports network name and password
- Functions as a bridge from Ethernet to Wi-Fi
- Add-on module to the Vision

Technical specifications

- 2.4GHz 802.11b/g/n compatible
- Support IEEE 802.3、IEEE 802.3u
- WiFi Client/AP/Router Mode
- Support multiple security authentication mechanisms:
  - WEP64/WEP128/ TKIP/ AES
  - WEP/WPA-PSK/WPA2-PSK
- Support multiple network protocols:
  - PPPOE/TCP/UDP/DDDNS/DHCP/DNS/HTTP
- Input – Ethernet interface
- Output – Wi-Fi, antenna
- Operating input voltage: +5VDC
- Operating temperature: -10℃ to +50℃
- Standards: CE

FOR BETTER PROTECTION
